DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-13, in the reply received on 26 July 2005 is acknowledged. The traversal is on the ground(s) that the Examiner has not shown the process and product claimed to be independent and distinct. This is not found persuasive because applicant's claimed process of making the device does not include steps of forming the electrical connecting pattern on a first sacrificial layer; forming the organic electroluminescent diode on a second sacrificial layer; and later removing the first and the second sacrificial layers, which are all included in the process cited in the Restriction Requirement.

- 2. Thus, the Examiner holds that the process cited in the Restriction Requirement is a materially different process than the claimed process. The requirement is still deemed proper and is therefore made FINAL.
- 3. Claims 14-23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 26 July 2005.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Application/Control Number: 10/685,477 Page 3

Art Unit: 2879

5. Claims 1-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

- 6. Independent claim 1 cites a limitation of "a height of the electrical connecting pattern is smaller than an original height of the electrical connecting pattern measured before an attachment of the first and second substrates" in the last three lines of the claim. Applicant's disclosure provides no standard for ascertaining an appropriate original height for the electrical connecting pattern. The original height of the electrical connecting pattern may have an infinite number of possibilities. Since applicant's disclosure does not provide any working examples, the Examiner submits that the experimentation needed to practice the invention is undue or unreasonable. Due to their dependency upon independent claim 1, claims 2-13 are also rejected for failing to comply with the enablement requirement.
- 7. The Examiner notes that a reasonable prior art search could not be performed due to the inability to ascertain the metes and bounds of the claimed invention.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kawasaki (US 6,426,245) discloses a semiconductor device. Yamazaki (US 6,420,834) discloses a light-emitting device. Hirakata (US

a semiconductor device.

Contact Information

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Kevin Quarterman whose telephone number is (571)

272-2461. The examiner can normally be reached on M-TH (7-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Nimesh Patel can be reached on (571) 272-2457. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
